OILBRUSHER AMMO ORGANIZER

STEP: 1

For the assembly of your organizer you will need white glue, preferably a quick drying type, and a disposable brush for application.

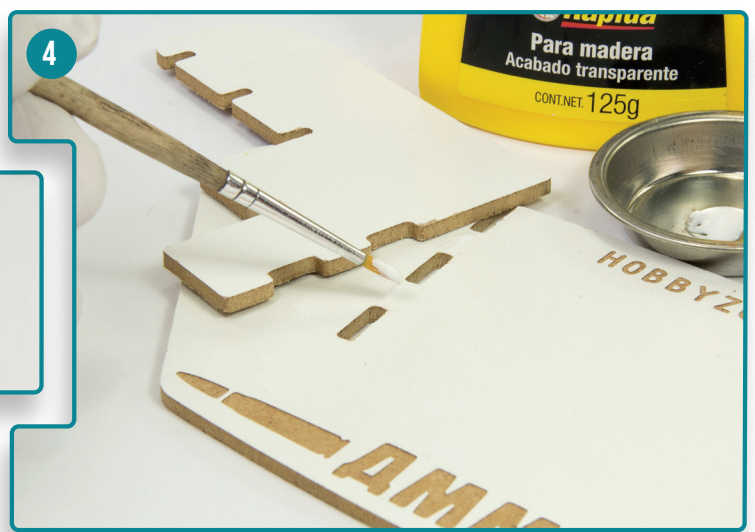

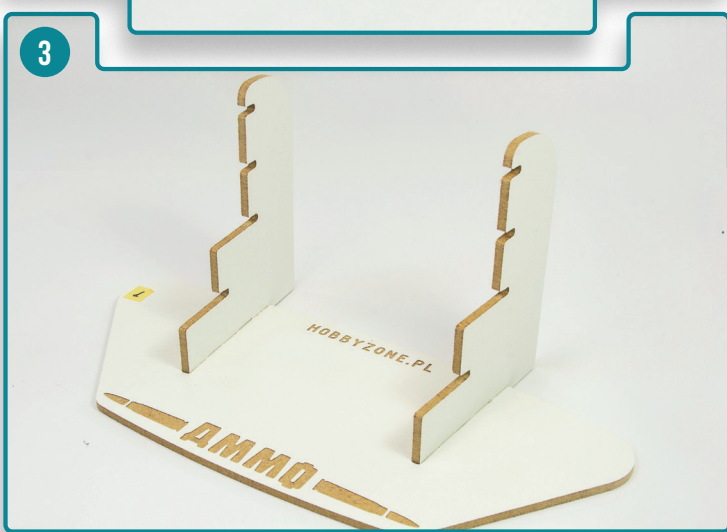

Necesitaremos para el montaje cola blanca, preferible de secado rápido, y un pincel viejo con el que poder aplicarla.

STEP: 2

The first step is to organize and separate the pieces to avoid errors during assembly.

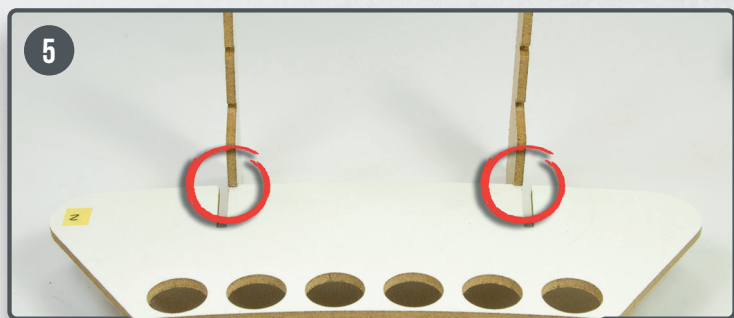

Lo primero que hacemos es ordenar las bandejas para evitar errores posteriores durante el montaje.

STEP: 3-4

Assembly begins by placing the vertical parts that hold each of the horizontal shelves, the joints can be reinforced by applying small quantities of white glue.

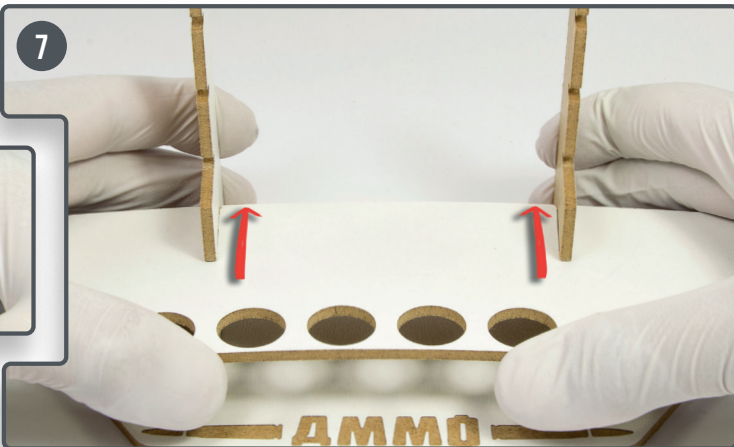

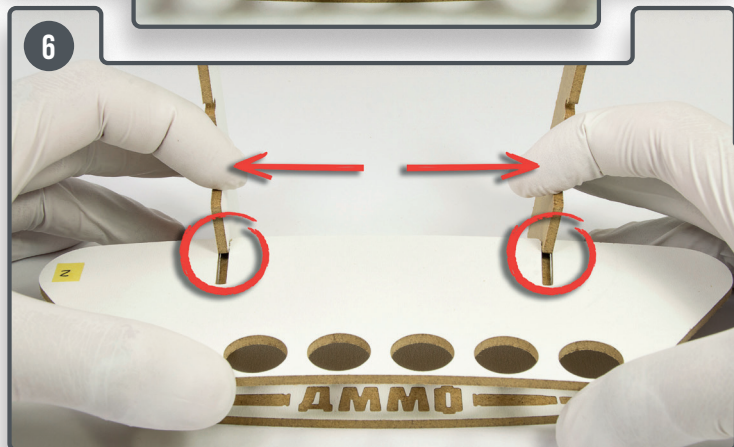

Comenzamos situando las columnas verticales que servirán de soporte a las bandejas donde encajarán los Olibrusher. Podemos reforzar las uniones aplicando pequeñas porciones de cola blanca.

STEP: 5

When placing the second level, it may seem that the fitting surfaces do not align, but this is not the case.

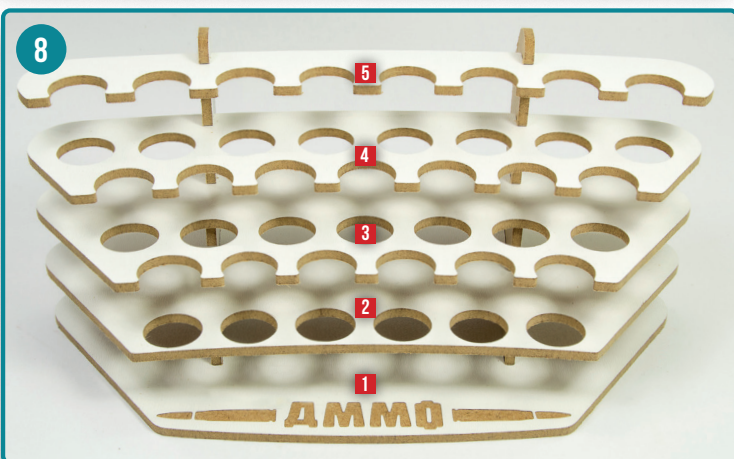

A la hora de presentar la bandeja dos sobre su ubicación puede parecer que los puntos de encaje no coinciden, pero no es así...

STEP: 6-7

Due to the curvature in the back of the organizer, you must separate the two vertical parts gently to make adjustments until the attachment surfaces match up. Then, move the rack backwards until it fits into the correct final position.

Por la curvatura trasera del organizador, para poder ajustarlo correctamente hay que separar, con suavidad las dos columnas verticales hasta que los puntos de encaje coincidan. Acto seguido, comenzamos a desplazar la bandeja hacia atrás hasta conseguir el encaje definitivo.

STEP: 8

Simply repeat these steps for the remaining horizontal Oilbrusher organizer shelves to complete your workspace organizer.

Ya podemos colocar cómodamente nuestros Oilbrusher en su sitio.

STEP: 9

You now have a logical desktop solution for organizing your projects and products, keeping your AMMO of Mig Jimenez Oilbrushers arranged and ready to use.
