

Quick Tips

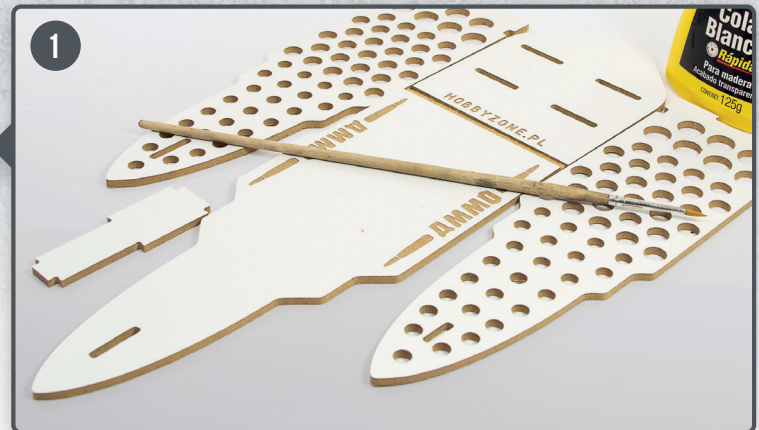

AMMO BRUSHES & TOOLS ORGANIZER

A.MIG-8022

STEP: 1

For the assembly of your organizer you will need white glue, preferably a quick drying type, and a disposable brush for application.

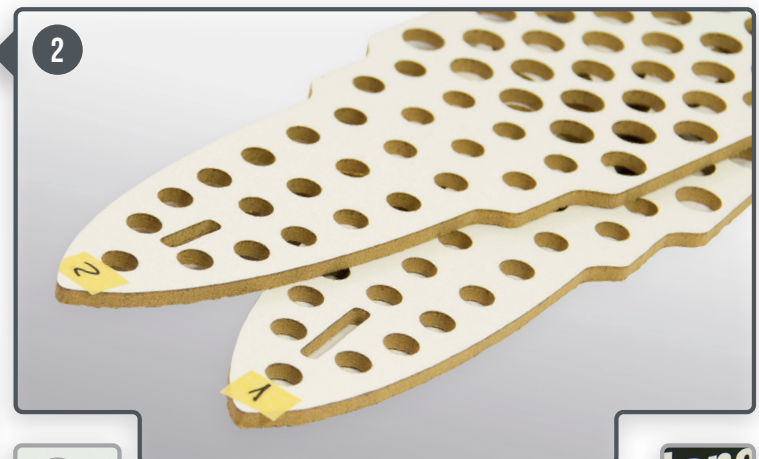

Para el montaje, solo necesitamos cola blanca, preferible de secado rápido, y un pincel viejo con le que poder aplicarla.

STEP: 2

The first step is to read this instruction sheet completely before you begin. Then, separate and arrange each piece of the organizer, as well any materials required in order to avoid mistakes during the assembly.

Organizamos las bandejas para evitar errores posteriores durante el montaje.

STEP: 3-4

Assembly begins by attaching the vertical section to the horizontal support floor.
Comenzamos el montaje pegando la columna frontal.

STEP: 5-6

The joints of the rear wall and the support floor can be reinforced by applying small quantities of white glue.

Después pegamos la pared trasera con el suelo del soporte.

STEP: 7

To glue the first horizontal brush organizer shelf, apply a small amount of white glue to the connection points for both the front column and the rear wall.

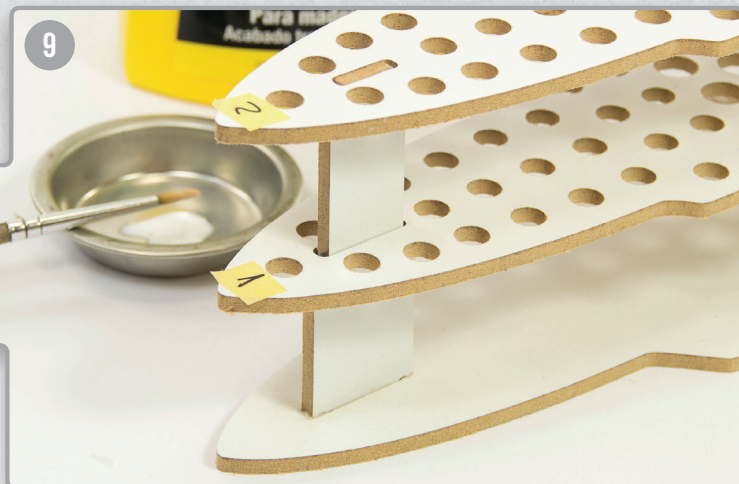

Para pegar la bandeja 1 aplicamos un poco de cola blanca sobre las zonas donde se va a apoyar, tanto en la columna frontal como en la pared trasera.

STEP: 8

Then simply adjust and align the organizer components correctly and allow the adhesive used to dry completely.

Acto seguido ajustamos y fijamos la bandeja.

STEP: 9

The same process shown in step 8 should then be repeated for the upper level and the corresponding support and rear wall connection points.

Repetimos el proceso como en el paso 8.
