

Quick Tips

AMMO BOOMERANG ORGANIZER

A.MIG-8028

STEP: 1

For the assembly of your Boomerang Organizer, you will need white glue, preferably a quick drying type, and a disposable brush for application.

Para el montaje, solo necesitamos cola blanca, preferible de secado rápido, y un pincel con el que poder aplicar la cola.

STEP: 2

The first step is to remove the vertical columns from the sheet using the appropriate cutting tool.

Con un cutter separamos las columnas verticales de su matriz.

STEP: 3

Assembly begins by attaching the vertical section to the horizontal support base.

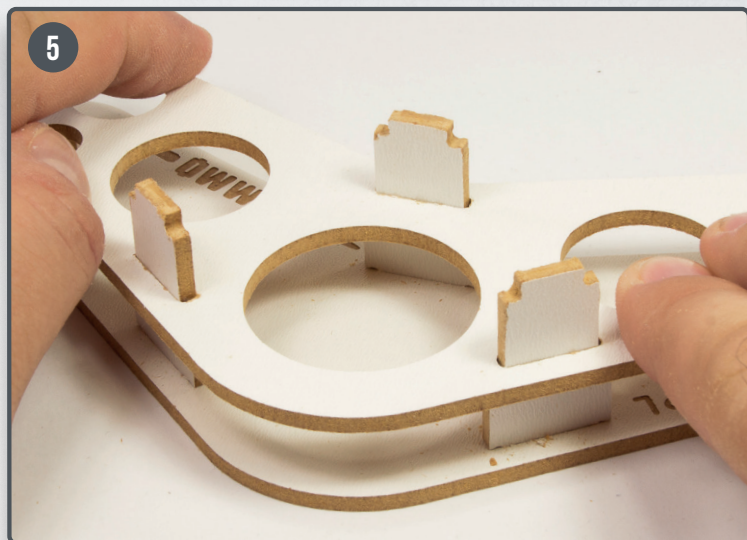

Comenzamos el montaje aplicando una gota de cola blanca y pegando la columnas verticales en la bandeja base.

STEP: 4

Apply a small amount of white glue to the connecting contact surfaces before installing the second horizontal level.

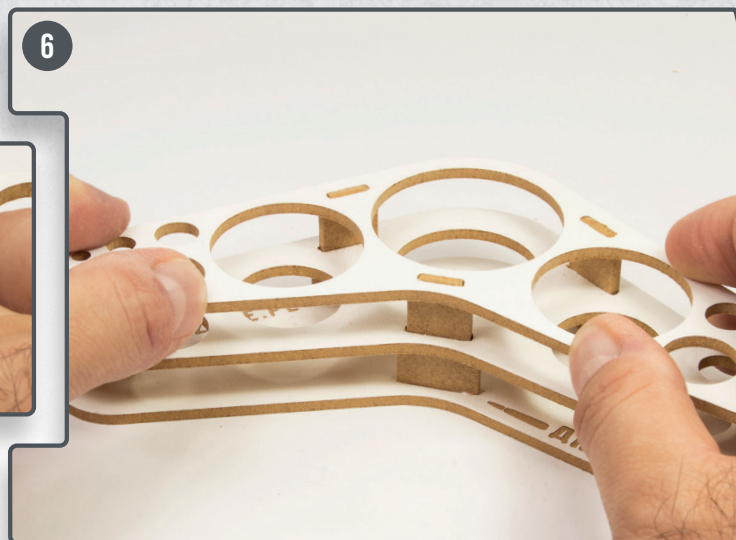

Volvemos a aplicar un poco de cola blanca antes de colocar la segunda bandeja.

STEP: 5

Then simply adjust and align the second level correctly and allow the adhesive used to dry completely.

Acto seguido ajustamos y fijamos la segunda bandeja.

STEP: 6

Repeat the same process to glue the top horizontal level.

Repetimos el proceso, del paso anterior, para pegar la última bandeja.

STEP: 7

You now have a logical desktop solution for organizing your projects and brush selection, keeping your AMMO of Mig Jimenez jars, bottles, brushes, and tools arranged and ready to use.

Tras dejar secar la cola blanca, ya podemos colocar todo nuestro material sobre nuestro organizador.
